Sally Kristen Ride was born in Encino, California, on May 26, 1951. Although she was a great tennis player, she gave up hopes of playing professionally and studied physics at Stanford University. In 1977 she was selected by NASA to become an astronaut. Ride achieved fame when she flew around the Earth on the seventh space shuttle mission on June 18, 1983. At the age of 32 she was also the youngest U.S. astronaut. During the six-day mission the crew put satellites in space and conducted research. Ride also flew on the 13th mission in 1984 and later served on the commission that investigated the 1986 Challenger disaster, when the shuttle exploded after takeoff. After retiring, Ride spent much of her time encouraging young women to study science and math and to become scientists and engineers.

Lance Mackey에 관한 다음 글의 내용과 일치하지 않는 것은?

I am excited today to congratulate Alaskan dog musher Lance Mackey and his team of dogs that carried him across the Iditarod finish line for a first-place finish in Nome, Alaska on March 16, 2010. The Iditarod is known as the toughest race on Earth. The trail spans across a significant portion of Alaska, and is roughly 1,100 miles long. The race begins in Willow, AK, and mushers cross the finish line in Nome. Mackey and his team rode into Nome just 51 seconds short of 9 days on the trail — this is the second fastest time in the 38-year history of the race. He crossed the finish line with 11 of the 16 dogs he started the race with — tired but still strong after the 1,000-mile journey. This victory landed Mackey his fourth win in a row — a title no Iditarod musher has claimed before.
