글의 흐름으로 보아, 주어진 문장이 들어가기에 가장 적절한 곳은?

From the perspective of 1950s telecommunications costs, that's incredibly wasteful.

The funny thing about waste is that it's all relative to your sense of scarcity. Our grandparents grew up in an age when a long-distance telephone call was an expensive luxury, to be scheduled and kept short. (①) Even today many people find it hard to keep people of that generation on a long-distance call for long — they still hear a meter ticking in their head and rush to finish. (②) But our kids are growing up in an age when long-distance is free on their cell phones and they'll happily chat for hours. (③) But today, when those costs have fallen to near zero, we don't give it a second thought. (④) It doesn't feel like waste at all. (⑤) In other words, one generation's scarcity is another's abundance.

Language also makes possible an explosive growth in a child's capacity to retain information in memory.

It is not at all hard to understand why having a good start increases the likelihood of a young person eventually becoming an especially capable adult. (①) Consider, for example, the advantage of gaining above-average language skills at an early age. (②) Acquiring language affects a child's capacities as a thinker in some fundamental ways. (③) That information in turn opens up the possibility of undertaking cognitive activities such as planning, reasoning and making choices and judgements, and anticipating the future, which are literally inconceivable in a species that lacks language. (④) In sum, acquiring language brings about a complete transformation in what a child is capable of. (⑤) As a result, those children who gain the advantages that are brought by the early acquisition of language skills will have their capacity to learn from their experiences broadened considerably.
