Since most of you are working on a word processor, it seems silly to spend too much time on spelling. Your word-processing program will spell check items for you. _____ (A) _____, spelling is not a completely lost art. There are words that are not in the spell checker's dictionary. Also, your spell checker will not help you if you misspell a word and mistakenly turn it into another word. _____ (B) _____, when you write 'lightening' instead of 'lightning,' the program will not recognize the error. So, get in the habit of rereading your work and looking up words that the spell checker does not pick up. You need to develop the skill of knowing when words look wrong. Never hand something in until you have checked it.
