The green revolution was a mixed blessing. Over time farmers came to rely heavily on broadly adapted, high-yield crops to the exclusion of varieties adapted to local conditions. Monocropping vast fields with the same genetically uniform seeds helps boost yield and meet immediate hunger needs. Yet high-yield varieties are also genetically weaker crops that require expensive chemical fertilizers and toxic pesticides. The same holds true for high-yield livestock breeds, which often require expensive feed and medicinal care to survive in foreign climates. The drive to increase production is pushing out local varieties, diluting livestock's genetic diversity in the process. As a result, the world's food supply has become largely dependent on a shrinking list of breeds designed for maximum yield. In short, in our focus on increasing the amount of food we produce today, we have accidentally put ourselves at risk for food shortages in the future.

Words & Phrases

- green revolution 녹색 혁명 (품종 개량에 의한 식량 증산)
- adapted (~에) 알맞은, 개조된
- variety 품종
- genetically 유전적으로
- pesticide 농약

- mixed blessing 좋기도 하고 나쁘기도 한 것
- high-yield 다수확의, 높은 산출량을 가진
- monocrop 단일 경작하다
- fertilizer 비료
- dilute 묽게 하다, 약하게 하다
