According to Confucius, all people are born honest and good, and deep down, they remain so. “Anyone (A) sees / seeing a small child playing near the water’s edge will worry lest it fall in,” he said. Concern for our fellow human beings and sympathy for the misfortunes of others are inborn sentiments. All we need to do is to make (B) sure / surely we do not lose them. And that, said Confucius, is why we have families. Someone who is always good to his parents, who obeys them and cares for them will treat others in the same way, and will obey the laws of the state in the same way that he obeys his father. Thus, for Confucius, the family, with its brotherly and sisterly love and respect for parents, (C) was / were the most important thing of all. He called it ‘the root of humanity’.

* Confucius 공자

The city of Athens established procedures for distinguishing right from wrong. On the south side of the chief marketplace stood the Court of the Heliasts, a large building with wooden benches for a jury at one end, and a prosecution and defendant’s platform at (A) others / the other. Trials began with a speech from the prosecution, followed by a speech from the defense. Then a jury numbering between 200 and 2,500 people would indicate (B) that / where the truth lay by a vote or a show of hands. This method of deciding right from wrong by counting the number of people in favor of a proposition (C) used / was used throughout Athenian political and legal life. Two or three times a month, all male citizens, some 30,000, were invited to gather to decide on important questions of state by a show of hands. For the city, the opinion of the majority was equated with the truth.

A major obstacle to discovery is not ignorance but knowledge. Because Aristotle was so comprehensive, logical, and brilliant, his writings became the ultimate standard of truth for 2,000 years. A major portion of Galileo's works was devoted to (A) disprove / disproving Aristotle so that the reader would be able to grasp his arguments. The difficulty was that a single authority (Aristotle) was held in such high regard (B) that / which alternative views could not get a hearing. In more recent times the work of Freud has had a similar effect. Freud's system of analysis assumed certain mental constructs a priori, so it was very difficult to revise or improve his theories. The result was that a fairly good number of psychoanalysts (C) remaining / remained Freudians though many psychologists began to ignore Freud altogether to make progress in their work.

The "mechanical" quality of life that industrialization promoted (A) to be / was proving to be a source of dissatisfaction for many, which made it ripe for its satirization by Charlie Chaplin in his 1936 film *Modern Times*. Chaplin's famous character, the Little Tramp, goes to work in a factory. He is instructed to stand at a particular spot on a fast-paced assembly line and (B) screw / screwing bolts onto the pieces of machinery that pass him at an ever-increasing rate. His hands become so accustomed to the prescribed movement that even after he has left the assembly line, he continues to compulsively twist anything that remotely resembles a screw. In the film's most famous scene, he becomes so overwhelmed by his work that he simply lies down on the conveyor belt and allows (C) him / himself to be pulled into the factory's mechanical belly.

* satirization 풍자

What time of the day is best for exercise? A person can exercise at almost any time of the day except about two hours ① following a large meal, or the noon and early afternoon hours on hot and humid days. Many people enjoy exercising early in the morning because it gives them a good boost ② to start the day. If you have a difficult time sticking to an exercise program, early morning exercise is best because the chances of some other activity or conflict interfering with your exercise time ③ is minimal. Some people prefer the lunch hour for weight-control reasons. By exercising at noon, they do not eat as big a lunch, ④ which helps keep down daily caloric intake. ⑤ Highly stressed people seem to like the evening hours because of the relaxing effects of exercise.

The reason nature is so wasteful is that scattershot strategies for reproduction are the best way to do ① what mathematicians call “fully exploring the potential space.” Imagine a desert landscape with two pools of water separated by some distance. If you are a plant ② growing next to one of those pools, you can have one of two different reproductive strategies. You can drop seeds near your roots, ③ where there’s a pretty good chance water can be found. This is safe, but soon leads to crowding. Or you can toss the seeds into the air and let ④ it float far away. This means that almost all will die, but it is the only way ⑤ to find that second pool of water, where life can expand into a new place, perhaps a richer one. It is wasteful, but it can pay off in the end.

* scattershot 무차별의

In his book *Good to Great*, Jim Collins tells the story of Admiral James Stockdale, the highest-ranking American prisoner of war in Vietnam. ① Known for his unbreakable character and resilience, Stockdale described the two defining characteristics of American captives who were most likely to survive the brutal conditions of a Vietnamese prison. First, they openly faced and accepted ② rather than ignored or dismissed the harsh facts of their difficulty. Second, they never stopped ③ believing that they would someday get out. In other words, while they did not run away from reality, accepting the brutal truths about their current conditions, they never lost hope ④ which all would work out well in the end. By contrast, both those who believed that they would never get out and those who believed that they would be freed within an unrealistically short period of time ⑤ were unlikely to survive.

* resilience 회복력

10 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

I was ① seated in the office of the vice-president of sales of a company I'd been consulting with for several years. The vice-president was interviewing someone for the position of regional sales director and asked me to listen in. The man ② interviewing was an experienced, successful salesman. Still, it was an important career meeting for him, and he was nervous. His response to the pressure of the interview was ③ to talk too much. The applicant felt ④ uncomfortable and was attempting to fill the uncertainty of the moment with sound. While trying to make a good impression, he presented himself poorly. A little conscious breathing would have enabled him to feel better about ⑤ himself and allowed him to be more calm and clear.

11 다음 글의 밑줄 친 부분 중, 어법상 틀린 것은?

In the middle of the thirteenth century, Matthew Paris drew a picture of an elephant, which was the first elephant ① that had been seen in England. The figure of the servant by its side is not a very convincing likeness, though we are given his name, Henricus de Flor. But what is interesting ② is that in this case the artist was very anxious to get the right proportions. Between the legs of the elephant there is a Latin inscription saying: 'By the size of the man ③ portrayed here you may imagine the size of the beast represented here.' To us this elephant may look a little odd, but it does show that medieval artists, at least in the thirteenth century, were very well aware of ④ such things as proportions, and that, if they ignored them so often, they ⑤ were so not out of ignorance but simply because they did not think they mattered.

The Louvre's CD-ROM offers a wonderful view of the *Mona Lisa*. One can almost see her very pores on the computer screen; the reproduction is brighter than the original, ① revealing more of the landscape in the background. The zoom tool permits viewers to ② carefully examine features as the commentator lists them. Yet people do still make a journey ③ see Leonardo's original painting in the Louvre. The feeling of awe is almost religious as international crowds file past the mysterious face ④ that rests, smiling, in her closed glass box. The atmosphere is one of quiet excitement and people record the momentous occasion with videos and snapshots. *Mona Lisa's* aura is by no means an illusion, ⑤ though there is something sadly ironic about visitors' trying to capture her with their own mechanical reproductions.

Vocabulary and Grammar

단어와 문법은 글을 읽고 쓰는 데에 있어 가장 기본적인 도구이다. 단어들이 문법 규칙에 의해 어구를 형성하고, 이렇게 형성된 어구는 다시 다른 단어나 어구와 결합되어 더 큰 어구를 이루고 궁극적으로 문장을 이룬다. 따라서 필요한 단어의 쓰임 및 뜻과 문법 규칙을 알지 못하면 문장을 이해하거나 사용할 때 매우 큰 어려움을 겪을 수밖에 없다. 일반적으로 능숙한 독자는 다른 사람들보다 더 많은 어휘 지식을 가지고 있고, 문법을 활용하는 능력이 뛰어나다. 하지만 이러한 지식을 쌓고 능력을 기르는 일은 글을 읽고 이해하는 과정을 통해서만 가능하다. 글을 읽고 이해하려면 어휘와 문법 지식이 필요한데, 이 필요한 어휘와 문법 지식은 다시 글 읽기를 통해서만 길러지는 순환 구조를 가지고 있다.

이러한 순환 구조에서 우리 『수능특강』 독자들이 능숙한 독자가 되기 위해서는 다음 세 가지를 갖추어야 한다.

- 첫째** 기본 어휘 1,000 단어는 어떻게 해서든지 익혀야 한다. 이 기본 어휘를 모르고서는 어떠한 읽기 전략도 효용이 없다.
- 둘째** 기본 어휘를 숙지한 후에는 단어의 의미를 문맥에서 유추하는 능력을 길러야 한다.
- 셋째** 마지막으로, 문법 규칙의 설명 그 자체가 아니라 설명이 의미하는 것을 내재화하여, 글을 읽고 쓸 때 그 지식을 활용할 수 있어야 한다.

Guessing New Words from Context

먼저, 글에서 새로운 단어를 보게 될 때 문맥을 통해서 그 단어의 의미를 유추할 수 있는지 스스로에게 물어 보라.

다음 문장을 보자.

Students mark the main idea with a felt-tip pen.

이 문장의 의미를 아는 데 있어, 밑줄 친 단어 felt-tip의 뜻을 정확하게 아는 것은 중요하지 않다. 이 단어가 일종의 펜(즉, 매직펜)을 가리키는 것으로 이해해도 이 문장의 뜻을 대략 이해하는 데 어려움이 없다.

정의를 활용한 어의 유추

가끔 새 단어의 정의를 활용하여 어의를 유추할 수 있다. 동사 *be(is 또는 are)*나 *mean(s)* 다음에 오는 정의에 특히 주목하라.

- A *strategy* is a plan for reaching an objective.
전략이란 목표에 도달하기 위한 계획이다.
- To *achieve* means to complete or reach something, such as a goal.
성취한다는 것은 목표와 같은 뭔가를 완수하거나 뭔가에 도달한다는 것을 의미한다.

예를 활용한 어의 유추

가끔 새 단어의 예를 통해 어의를 유추할 수 있다.

- She studies *apes* such as gorillas and chimpanzees.
그녀는 고릴라와 침팬지 같은 유인원을 연구한다.
- These apes learned *words of direction* —for example, left and right.
이들 유인원은 예를 들어, 왼쪽과 오른쪽 같은 방향어를 배웠다.

설명을 활용한 어의 유추

새 단어에 대한 설명으로부터 어의를 유추할 수 있을 때가 가끔 있다. 이러한 설명은 보통 동격 표현이나 *that is* 다음에 오는 말이 해 주는데, 이어지는 다음 문장이 해 주는 경우도 있다.

- *Syntax* —the grammar rules of a language —is necessary for effective expression and communication.
통사론, 즉 언어의 문법 규칙은 효과적인 표현과 의사소통을 위해 필요하다.
- It allows an animal to be *adaptable* —that is, able to change in a new situation.
그것으로 인해 동물은 적응—새로운 상황에서 변화—할 수 있다.
- Some Americans began to *resent* the new immigrants. They felt anger toward them because they dressed and sounded “different” and “foreign.”
몇몇 미국인들이 새 이민자들에게 분개하기 시작했다. 이들은 이민자들이 ‘다르게’ 그리고 ‘이국적으로’ 옷을 입고 (말하는 것으로) 들리기 때문에 이들에게 분노를 느꼈다.

배경 지식이나 글의 흐름을 통한 어의 유추

새 단어의 의미를 주어진 글과 관련된 배경 지식이나 글의 전체적인 흐름으로부터 유추할 수 있다. 수능 어휘 문제 해결에 가장 유용한 전략이다.

Zoom Out 1

다음 글을 읽고, *circuitous*의 뜻이 무엇인지 유추해 보자.

As soon as I asked Magdalena to drive, I knew I had made my usual mistake. She was an excellent driver but always took the most *circuitous* route in order to enjoy the scenery. By the time we arrived at the restaurant, waiters were clearing the tables, and the restaurant was closed until dinnertime.

위 글은 운전사가 경치를 감상할 수 있는 길을 택했기 때문에, 점심 식사에 너무 늦게 도착하였다고 말하고 있다. 우리의 배경 지식에 의하면, 멋진 경치를 감상할 수 있는 도로는 직선 도로가 아닌 꼬불꼬불한 길이고 시간이 많이 걸리는 길이다. 이를 미루어 *circuitous*가 '길이 도는, 우회하는'이라는 의미임을 짐작할 수 있다.

또 다른 예로 1강 5번 지문의 일부를 다시 읽고, 네모 안에서 어느 단어가 들어가야 적절한지 생각해 보자.

Reaching beyond realism, the naturalists tried to illustrate as faithfully as possible whatever was observable to them within their literary works. They wanted to [hide / reveal] the dominant states of things in all areas of life. While the realists tried to evoke the impression that the characters really exist and that the events narrated are the events of ordinary experience, the naturalists wanted to give a strictly [objective / subjective] depiction of the struggle against nature as a hopeless fight, believing that human behavior is determined by the environment...

위 글의 'They wanted to ~ in all areas of life.'는 바로 앞 문장의 내용을 보충·설명하고 있다. 자연주의자들은 관찰할 수 있는 어떤 것도 가능한 충실하게 보여 주려고 했기 때문에, 이들은 삶의 모든 영역에서 사태의 주된 상황을 드러내고(reveal) 싶어 했다. 첫 문장에서 사실주의를 뛰어넘은 자연주의 작가들이 관찰 가능한 모든 삶의 모습을 가능한 충실하게 기술하려고 했다고 했기 때문에, 이들이 자연에 대한(인간의) 투쟁을 가망 없는 싸움으로서 엄격히 객관적(objective)으로 묘사하기를 원했다는 것을 알 수 있다.

Examples of Grammar Test

2011학년도 및 2012학년도 수능 시험과 2011년 6월과 9월에 있었던 2012학년도 수능 모의평가에서 다루었던 주요 문법 항목을 요약하면 다음과 같다.

주어 + 동사

- ~ **what** we really want, it seems, **is** to stop wanting. 주어가 절일 때에는 단수 취급
- We **are trapped** deep in a paradox ~. 능동태와 수동태의 구분
- ~ on which **were** placed possible technical **solutions** that other teams might use in the future.
도치된 주어인 possible technical ~ in the future와 were의 일치

동사 + 보어

- ~ **is as subtle / subtly** as a pause. 동사 is의 보어는 형용사구
- This **sounds obvious** ~. 동사 sounds의 보어는 형용사
- The way around this **is to see** that habits are ~. 보어로서의 to부정사

동사 + 목적어 + 보어

- ~ **make fieldwork sound** exciting ~. 목적보어로서의 원형부정사
- ~ **find them wholly to occupy / occupied** with the past ~.
목적보어로서의 분사, 능동과 수동의 의미 구분

명사구

- ~ the **vast detailed** intricacy ~. 수식 형용사의 중첩

형용사구

- **So / Such imprudent** are we that we ~. 형용사나 부사는 such가 아닌 so로 수식

관계절

- ~ **adventure which** soon **adopts** ~. 단거리 관계절에서의 주격 관계대명사의 일치
- ~ an **acquaintance who / whom** I was certain **was** going to ~.
장거리 관계절에서의 주격 관계대명사의 일치
- ~ 3,540 kilometers from **what / where** they were lost.
전치사의 목적어로 사용된 독립 관계절(independent relative clause)
- ~ a right course of action, **through which** one may provoke ~. 관계절의 계속적 용법

일치

- ~ **halfhearted individuals** are ~ even when it involves **their** own welfare.
대명사와 선행사의 수와 인칭에서의 일치

평행 구조

- ~ try to **support** the present with the future and **think / thinking** of ~. to에 걸린 support와 think
- ~ had university students **read** a personality description of someone and then **summarize / summarized** it for someone else ~. read와 summarize가 평행 구조를 이룸

분사 구문

- **Asked / Asking** to recall what they had read, they remembered ~. 능동과 수동의 구분
- He goes on to describe his daily routine of strolling through the village **observing** the intimate details of family life. 부수적인 상황을 묘사하는 분사 구문
- ~ derived from the Latin word 'cor' **meaning** 'heart.' 수식어로서의 분사 구문

문법적인 열과 비문법적인 열 (Grammatical and Ungrammatical Strings)

- ~ **believe what / that** they are saying.
동사 saying 이전까지의 believe what they are와 believe that they are가 둘 다 문법적이지만, saying으로 문장이 끝나기 때문에 believe의 목적어는 saying의 목적어가 빠진 불완전한 that절이 될 수 없고 saying의 목적어로 여겨지는 what으로 시작하는 관계절이어야 한다.
- It is true that **the questions dealt / dealing** with very personal issues, but I ~.
but으로 시작하는 등위 접속문이 issues 다음에 이어지기 때문에, 명사구가 아닌 문장 the questions dealt with very personal issues만이 문맥에서 가능하다.

Zoom In

다음 글의 주제로 가장 적절한 것은?

• 2012학년도 수능 34번 •

Living things naturally return to a state of balance. When we are disturbed by forces acting on us, our inner machinery kicks in and returns us to a balanced state of equilibrium. *Homeostasis* is the word we use to describe the ability of an organism to maintain internal equilibrium by adjusting its physiological processes. Most of the systems in animal and human physiology are controlled by homeostasis. We don't like to be off balance. We tend to keep things in a stable condition. This system operates at all levels. Our blood stays the same temperature. Except for extraordinary exceptions, when people find ways to intervene using methods more powerful than our tendency to equilibrium, our habits, behaviors, thoughts, and our quality of life stay pretty much the same too.

- ① physical balance needed for mental equilibrium
- ② inner mechanisms to enhance the quality of life
- ③ general tendency of organisms to keep equilibrium
- ④ major differences in animal and human physiology
- ⑤ biological processes resulting from habitual behaviors

Words & Phrases

- act on ~에 작용하다, 영향을 주다
- homeostasis 항상성
- intervene 개입하다, 끼어들다

- kick in 작동하다, 효력을 나타내다
- physiological 생리적인

- equilibrium 평형
- off balance 균형을 잃은, 균형이 깨진
