Economic distance relates to the time and cost involved in traveling from the origin to the destination area and back. The higher the economic distance, the higher the resistance for that destination and, consequently, the lower the demand. _____ (A) _____, it follows that between any origin and destination point, if the travel time or travel cost can be reduced, demand will increase. This may be best illustrated by two turning points in the history of commercial airline service. The introduction of the jet plane in 1959 first cut travel time between California and Hawaii from twelve hours to five hours, and demand grew dramatically. _____ (B) _____, the introduction of the wide-bodied plane for transatlantic flights in the late 1960s brought a surge in demand for seats. The introduction of these planes cut the travel cost by almost fifty percent between the U.S. and most countries on the European continent.

In offering help to their partners, women are inclined to express sympathy and share examples of their own similar experiences in an effort to convey the message, “I understand you; you’re not alone.” _____ (A) _____, men are more likely to help by problem-solving or offering suggestions. Both are caring responses! But often neither effort goes over very well. Women are apt to hear men’s problem-solving efforts as unsympathetic. What women want is a sympathetic ear; what they hear is an impatient, “Why don’t you just fix it this way?” — often with the shaming message that they are incompetent. _____ (B) _____, men are truly puzzled by their partners’ lack of appreciation for their problem-solving efforts. Moreover, the rejection of their well-meaning offer of help is hurtful and, in many cases, shaming.

In all societies, relatives are referred to by special terms. In every system of kinship terminology, some relatives are classed together (referred to by the same kinship term). _____ (A) _____, in the kinship language of English, the individual uses the term “aunt” to refer to both the mother’s and the father’s sisters. The women who marry the brothers of either the father or the mother are also called aunts. The English language puts these women together in the same category because their relationship to the individual in terms of intimacy and authority is generally similar. In other cultures, _____ (B) _____, where the father’s sister and the mother’s sister have different rights, obligations, and relationships to the individual, these female relatives are differentiated from each other (called by different terms). Thus, the ways in which relatives are classified differ from culture to culture.

As most parents will tell you, children sometimes prompt how others treat them. The way you socialize children is often influenced by their reaction to you. For example, I needed only to look sternly at my son or speak in an assertive tone, and he would comply with what was asked of him. _____ (A) _____, my daughter would need to experience consequences — being sent to her room, withdrawal of privileges, having to do extra chores — before she would comply with family rules. Even in college, she had to get numerous parking tickets before she realized paying for them was more painful than getting up earlier to find even a distant parking space from her class and walking. _____ (B) _____, not only do children actively contribute to interactions, but in so doing, they affect their own developmental outcomes, transforming themselves in the process and influencing how others respond.

Music affects our emotions indirectly, by changing our mood. Little scientific research has been done to find exactly which kinds of music tend to put people in which moods. _____ (A) _____, most people today know the irritating effects of being exposed to loud, repetitive music from a fellow-passenger's MP3 player. Hearing such music does not usually send you into a fit of rage immediately. Rather, it gradually puts you in a bad mood, which then makes you more easily angered. _____ (B) _____, supermarkets do not use soft music to make us happy directly; that would rather defeat their objective, since the supermarket bosses do not want you to feel fulfilled by the music itself. Rather, they hope that the music will put you in a relaxed mood, which will in turn make you more sensitive to happy thoughts, such as the pleasure of consuming an expensive chocolate cake.

An illusion that has puzzled man for hundreds of years is the moon illusion—the fact that the moon looks larger near the horizon than when it is overhead. _____ (A) _____, of course, the moon does not change size, and the image cast on the retina is the same whether the moon is overhead or at the horizon. What, then, is the cause for such a difference? One theory holds that when the moon is seen in context—that is, in relation to its background—objects in the background provide distance cues. Since we think of the moon as being farther away than the trees and buildings seen with it on the horizon, we perceive it as larger. _____ (B) _____, if the retinal image of an object remains constant, an increase in apparent distance will produce a corresponding increase in perceived size.

Giorgio Vasari에 관한 다음 글의 내용과 일치하지 않는 것은?

• 2012학년도 수능 38번 •

Giorgio Vasari, the Italian painter, architect, and writer, was born in Arezzo in 1511. He was considered to be more successful as an architect than a painter. But what made him truly famous was his book *Lives of the Most Eminent Painters, Sculptors and Architects* (shortened as *Lives*). It is not known exactly how many copies of the first edition of *Lives*, published in 1550, were printed, but it earned Vasari the praise of his peers. Then in a revised edition of *Lives* in 1568, complete with portraits of the artists, he combined biographical anecdotes with critical comment. Although the revised edition overshadowed Vasari's own achievements as a painter and architect, it made him the most respected man of the Italian art world. He was even knighted by Pope Pius V in 1571.

- ① Arezzo에서 태어난 이탈리아 화가, 건축가 겸 작가였다.
- ② *Lives*의 초판본으로 동료들로부터 칭송을 받았다.
- ③ *Lives*의 개정판에 예술가들의 전기적 일화와 비평을 함께 실었다.
- ④ *Lives*의 개정판으로 이탈리아 예술계에서 존경을 받지 못하게 되었다.
- ⑤ 1571년에 교황으로부터 기사 작위를 받았다.

Words & Phrases

- eminent 저명한, 뛰어난
- knight 기사의 작위를 수여하다

- anecdote 일화

- overshadow 그늘지게 하다, 가리다

Problem-Solving Strategies

1
단계

무엇에 관한 내용인지 글의 소재를 파악한다.

이 글은 이탈리아의 화가, 건축가, 작가인 Giorgio Vasari의 전기를 소개하는 글이다.

2
단계

선택지를 살펴보고, 확인해야 할 사항을 미리 염두에 둔다.

선택지의 내용을 빨리 훑어보고 글을 읽으며 집중해야 할 세부 사항을 결정한다.

Giorgio Vasari의 출생 및 배경 / Giorgio Vasari의 작품 *Lives*에 대한 초판과 개정판에 대한 내용과 성공 / Giorgio Vasari의 명예(즉, 작위 수여)에 관한 내용

3
단계

세부적으로 글을 읽으면서 하나하나 내용을 대조해 본다.

① Arezzo에서 태어난 이탈리아 화가, 건축가 겸 작가였다.

Giorgio Vasari, the Italian painter, architect, and writer, was born in Arezzo in 1511.

→ “이탈리아의 화가, 건축가 겸 작가인 Giorgio Vasari는 1511년에 Arezzo에서 태어났다.” 이 문장의 해석을 보면 선택지의 내용과 일치한다.

② *Lives*의 초판본으로 동료들로부터 칭송을 받았다.

It is not known exactly how many copies of the first edition of *Lives*, published in 1550, were printed, but it earned Vasari the praise of his peers.

→ “1550년에 발행된 ‘생애’라는 책의 초판이 얼마나 많은 수량이 인쇄되었는지는 정확하게 알 수 없지만, 그것은 Vasari로 하여금 동료들의 칭찬을 받게 해 주었다.” 이 문장의 해석을 보면 선택지의 내용과 일치한다.

③ *Lives*의 개정판에 예술가들의 전기적 일화와 비평을 함께 실었다.

Then in a revised edition of *Lives* in 1568, complete with portraits of the artists, he combined biographical anecdotes with critical comment.

→ “그리고 예술가들의 초상을 완비한 1568년에 발행된 ‘생애’의 개정판에서 그는 전기적인 일화들과 비평을 결합시켰다.” 이 문장의 해석을 보면 선택지의 내용과 일치한다.

④ *Lives*의 개정판으로 이탈리아 예술계에서 존경을 받지 못하게 되었다.

Although the revised edition overshadowed Vasari’s own achievements as a painter and architect, it made him the most respected man of the Italian art world.

→ “비록 개정판이 화가와 건축가로서의 Vasari 자신의 업적을 가리기는 했지만, 그것으로 그는 이탈리아의 예술 세계에서 가장 존경받는 인물이 되었다.” 이 문장의 해석을 보면 선택지의 내용과 달리 ‘존경받는 인물이 되었다’는 내용이므로, ④는 글의 내용과 일치하지 않는다.

⑤ 1571년에 교황으로부터 기사 작위를 받았다.

He was even knighted by Pope Pius V in 1571.

→ “심지어 그는 1571년에 교황 Pius 5세에 의해 기사의 작위를 받기도 했다.” 이 문장의 해석을 보면 선택지의 내용과 일치한다.

Anthony Burns에 관한 다음 글의 내용과 일치하는 것은?

Anthony Burns was born a slave in Virginia, and early on disregarded law by learning to read and write. Converted to the Baptist faith while a young man, he began to preach. When his owner hired him out, he gained enough autonomy to plan his escape. In February 1854, at the age of nineteen, he hid himself on a ship bound from Richmond to Boston, where he found work. Ironically his ability to write led to his capture. A letter home was intercepted; it revealed where he was, and his master demanded that the Boston court return him to slavery in accord with the Fugitive Slave Law. Despite the desperate mobilization of the abolitionists to save him, government forces succeeded in shipping Burns back to Virginia in June 1854.

* abolitionist 노예 폐지론자

- ① 태어나면서부터 침례교 신자였다.
- ② 열아홉 살에 Richmond로 가는 배를 탔다.
- ③ 글을 쓸 수 있어서 도피 생활을 할 수 있었다.
- ④ 주인이 노예 신분으로 되돌려 달라고 법원에 요구했다.
- ⑤ 노예 폐지론자 덕분에 Virginia로의 송환을 피할 수 있었다.

2

The Complete Herbal에 관한 다음 글의 내용과 일치하는 것은?

The Complete Herbal written by Nicholas Culpeper first appeared in 1652. Culpeper's aim was to supply the information that would allow ordinary people to identify medicinal plants they could find growing in fields and bushes near their homes and use them to make home remedies that would heal them. Sometimes he described precisely where a particular herb could be found. The book sold for three pence, which made it available to the poor. Also, Culpeper wrote in simple, straightforward English that ordinary people could understand. *The Complete Herbal* was an immediate success. For more than 250 years it was the principal guide to traditional cures that ordinary people used, and it is still in print. Nicholas Culpeper is regarded as one of the founding fathers of modern herbalism.

* herbalism 약초 연구

- ① 전문 의료인을 위한 참고 자료로 저술되었다.
- ② 비싼 가격 때문에 가난한 사람들이 구하기가 어려웠다.
- ③ 일반인들이 이해하기 어려운 용어가 많이 사용되었다.
- ④ 발행 초기에는 많은 관심을 받지 못했다.
- ⑤ 전통적 치료법의 주요 안내서로 현재도 출판되고 있다.

3

Rosalind Elsie Franklin에 관한 다음 글의 내용과 일치하는 것은?

Rosalind Elsie Franklin was born in London, England. She excelled at science and received a doctorate in physical chemistry from Cambridge University in 1945. She spent three years in France, where she learned to use x-rays to study tiny structures such as crystals. At King's College, London, Franklin used this technique to discover crucial keys to DNA's structure. DNA stores all the information needed to create an organism, or living individual. Without Franklin's knowledge, a colleague, Maurice Wilkins, presented her findings to James Watson and Francis Crick, rival scientists at Cambridge University. They used her data to build a description of DNA's structure. In 1962, four years after Franklin's death at 37 from cancer, Watson, Crick, and Wilkins shared the Nobel Prize in Physiology and Medicine. Many scientists believed that Franklin should have been honored with them.

* physiology 생리학

- ① 1945년에 생물학 박사 학위를 받았다.
- ② DNA 구조의 결정적인 단서를 발견하기 위해 엑스레이를 이용했다.
- ③ Cambridge 대학교 과학자들에게 연구 결과를 제공하는 데 동의했다.
- ④ 사십대 초반에 암으로 사망했다.
- ⑤ 1962년에 노벨상을 공동으로 수상했다.

4

Canella 족의 부락에 관한 다음 글의 내용과 일치하는 것은?

The Canella always settle near some watercourses and galeria forests; because of their passion for daily dancing they choose for a site some hard dirt ground. A typical village is about nine hundred feet in diameter, with the houses arranged along the circular boundary. A ring-like boulevard, uniformly over twenty feet in width, runs along the inner side of the house circle, widening at two spots into a dance ground. Since the residents are forever dancing and racing there, not a blade of grass is to be seen growing on the boulevard. In the center of the village is a circular plaza about one hundred and fifty feet in diameter, with which each house is connected by a path kept clear for festive occasions, while between these paths the grass grows undisturbed. The total aspect of the settlement thus suggests a giant wheel with its spokes.

* galeria forest 강을 따라 생긴 대성림

- ① 수로에서 멀리 떨어진 곳에서 형성된다.
- ② 가옥의 배열이 타원형을 이루고 있다.
- ③ 가옥을 따라 일정하지 않은 넓이의 큰 길이 나 있다.
- ④ 중앙에 지름 150여 피트의 원형 광장이 있다.
- ⑤ 풀이 자란 곳을 발견하기가 어렵다.

5 다음 글의 내용과 일치하는 것은?

Around 2000 B.C., the Indo-European tribe known as the Hittites settled in Asia Minor. Around 1630 B.C., Hattusilis I united the multiple communities of the region under his rule. Through the capital city of Hattusa, the Hittites expanded their empire throughout Asia Minor. In their attempt to gain control over Syria, the Hittites clashed with the Egyptians. Following the Battle of Kadesh in 1285 B.C. between the Hittites and the Egyptians, a peace treaty divided Syria. Afterwards, the Hittite empire began to show signs of decline. Power struggles within the royal court, poor harvests and hunger compounded the empire's problems. Attacks by "Sea-people" led to a rapid collapse of the empire, which occurred practically overnight. The capital was destroyed around 1200 B.C. while smaller Hittite countries continued to exist in southeast Anatolia and northern Syria. These, however, were later conquered by the Assyrians during the 7th century B.C.

- ① Hittite 인들은 인도·유럽어를 사용한 부족으로 기원전 2000년경에 소아시아를 떠났다.
- ② Hattusilis 1세는 기원전 13세기에 수도 Hattusa를 통해 제국을 확장했다.
- ③ Hittite 인들은 기원전 1285년에 시리아를 얻기 위해 이집트와 전쟁을 벌였다.
- ④ Hittite 인들은 기원전 1200년경에 Sea-people의 침략으로부터 수도를 지켜냈다.
- ⑤ Hittite 인들은 기원전 7세기에 소규모 나라들을 모아 제국을 재건했다.

6 다음 글의 내용과 일치하는 것은?

Anyone who has seen Akira Kurosawa's 1961 samurai classic *Yojimbo* knows that Sergio Leone's *A Fistful of Dollars* (shortened as *Fistful*) is an almost scene-for-scene remake. But Leone seemed unaware of the legal implications of his copycatting. He never publicly acknowledged his creative debt to Kurosawa and refrained from offering the Japanese master any royalties. In fact, during production of *Fistful*, Leone's production company told everyone concerned to "refrain under any circumstances from mentioning the word *Yojimbo*." When Kurosawa learned what was going on, he sent Leone a letter praising the Italian's film and asking for his cut of the pie. "*Fistful* is a very fine film, but it is my film. You must pay me," Kurosawa wrote. Leone, who was thrilled that a filmmaker of Kurosawa's stature would threaten to sue him, eventually agreed to give him fifteen percent of *Fistful*'s worldwide box-office receipts.

* copycat 모방하다, 흉내 내다

- ① *Yojimbo*는 *Fistful*을 다시 만든 영화이다.
- ② Leone는 Kurosawa의 작품을 모방한다는 사실을 미리 공표했다.
- ③ Leone가 먼저 Kurosawa에게 저작권 사용료에 대해 문의했다.
- ④ Kurosawa는 Leone가 만든 영화에 대해 혹평했다.
- ⑤ Kurosawa는 *Fistful* 흥행 수입 일부를 받기로 했다.

7

Sally Kristen Ride에 관한 다음 글의 내용과 일치하지 않는 것은?

Sally Kristen Ride was born in Encino, California, on May 26, 1951. Although she was a great tennis player, she gave up hopes of playing professionally and studied physics at Stanford University. In 1977 she was selected by NASA to become an astronaut. Ride achieved fame when she flew around the Earth on the seventh space shuttle mission on June 18, 1983. At the age of 32 she was also the youngest U.S. astronaut. During the six-day mission the crew put satellites in space and conducted research. Ride also flew on the 13th mission in 1984 and later served on the commission that investigated the 1986 Challenger disaster, when the shuttle exploded after takeoff. After retiring, Ride spent much of her time encouraging young women to study science and math and to become scientists and engineers.

- ① 프로 테니스 선수가 되는 것을 포기했다.
- ② 일곱 번째 우주 왕복선 임무 수행 후 큰 명성을 얻었다.
- ③ 삼십대 초반에 미국의 최연소 우주 비행사가 되었다.
- ④ 이륙 후 폭발한 우주 왕복선 참사의 책임을 추궁 받았다.
- ⑤ 은퇴 후 젊은 여성들에게 과학과 수학을 공부하라고 격려했다.

8

Lance Mackey에 관한 다음 글의 내용과 일치하지 않는 것은?

I am excited today to congratulate Alaskan dog musher Lance Mackey and his team of dogs that carried him across the Iditarod finish line for a first-place finish in Nome, Alaska on March 16, 2010. The Iditarod is known as the toughest race on Earth. The trail spans across a significant portion of Alaska, and is roughly 1,100 miles long. The race begins in Willow, AK, and mushers cross the finish line in Nome. Mackey and his team rode into Nome just 51 seconds short of 9 days on the trail — this is the second fastest time in the 38-year history of the race. He crossed the finish line with 11 of the 16 dogs he started the race with — tired but still strong after the 1,000-mile journey. This victory landed Mackey his fourth win in a row — a title no Iditarod musher has claimed before.

* musher 개썰매를 모는 사람

- ① 2010년의 Iditarod 경주에서 우승했다.
- ② 2010년의 Iditarod 경주에서 개썰매를 약 1,100마일 몰았다.
- ③ 38년 된 Iditarod 경주 대회 신기록 보유자이다.
- ④ 2010년의 Iditarod 경주에서 열여섯 마리의 개와 함께 참여했다.
- ⑤ Iditarod 대회 사상 처음으로 4회 연속 우승했다.

9

Carl Rogers에 관한 다음 글의 내용과 일치하지 않는 것은?

Carl Rogers spent his early years in a wealthy Chicago suburb. His father viewed such activities as playing cards and going to the movies as questionable. When Rogers was twelve, his family moved to a farm farther from the city to protect the children from what his father perceived to be immoral influences. Rogers took refuge in books and developed an interest in science. His first college major was agriculture. During a student visit to China in 1922, he was exposed for the first time to people from different racial backgrounds. It was during this period that he wrote his parents proclaiming his independence from their conservative views. Shortly thereafter he developed an ulcer and had to be hospitalized. It is unclear whether Rogers's rebellion against his father and the development of the ulcer were causally linked, but the coincidence seems quite noteworthy.

* ulcer 궤양

- ① 아버지가 카드 게임이나 영화 구경을 부정적으로 보았다.
- ② 열두 살 때 가족이 도시에서 멀리 떨어진 농장으로 이사를 했다.
- ③ 과학에 대한 흥미가 있었고 대학에서 농업을 전공했다.
- ④ 1922년에 처음으로 다른 인종의 사람들을 만났다.
- ⑤ 병원에 입원한 동안 부모님의 견해에 반대하는 편지를 썼다.

split-level houses에 관한 다음 글의 내용과 일치하지 않는 것은?

You may never have visited a split-level home, but you have probably seen one on TV, especially if you have ever watched an American television show recorded during the 1960s or 1970s. These houses have internal stairs that allow the main entrance to reach both a sleeping level and an entertainment level. Because of a high demand for this kind of “isolated” living in the 1950s and later, many of these houses were built quickly and cheaply. The concept of a split level derives from legendary architect Frank Lloyd Wright's idea of houses with “half floors” that would blend more naturally with the surrounding landscape. The method behind split-level mania is that a house with a stacked floor plan does not require a level lot. Like “bank barns,” split-levels could be built into, against, or even on a hill.

* bank barn 언덕과 연결해서 지은 헛간

- ① 1960년대에 제작된 미국 방송 프로그램에서 볼 수 있다.
- ② 중앙 출입구에서 두 개의 층으로 연결되는 내부 계단이 있다.
- ③ 짧은 공사 기간과 저렴한 비용으로 1950년대 이후 많이 지어졌다.
- ④ Frank Lloyd Wright의 집에 대한 생각에서 비롯되었다.
- ⑤ 경사진 곳을 피해 주로 평평한 부지에 지어졌다.
