

## Problem-Solving Strategies

1  
단계

주어진 문장에서부터 글의 주제나 글의 개략적인 윤곽을 유추한다.

|           |                                                                                                                |
|-----------|----------------------------------------------------------------------------------------------------------------|
| 주어진<br>문장 | 건강에 대해 걱정하고 있는지, 범죄, 전쟁, 테러리스트의 공격을 두려워하고 있는지를 묻고 있다. 따라서 주어진 문장은 글의 도입부에 해당한다.                                |
|           | <b>worry</b> about <i>losing your good health</i> ; <b>fear</b> that <i>crime, war, or terrorist attacks</i> ~ |

2  
단계

이어지는 문장들에서 사용된 지시어, 대명사, 연결어(구) 등을 활용하여 문장 간의 연계성을 유추한다.

|     |                                                                            |
|-----|----------------------------------------------------------------------------|
| (B) | These are legitimate concerns ~의 <b>These</b> 가 주어진 문장의 worry와 fear를 가리킨다. |
|     | 사람들이 뉴스를 보고 자신의 안녕에 대한 위협을 과대평가하고 있다고 하는데, 그 이유는? ( <b>Why?</b> )          |

3  
단계

(B)의 질문 Why?에 상응하는 문장을 파악한다.

|     |                                                                                                                                            |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------|
| (A) | <b>It's because</b> ~가 (B)의 Why?에 대한 답인데, 그 이유는 텔레비전이 세상을 실제보다도 더 위험한 것처럼 보이게 하기 때문이다.                                                     |
|     | 따라서 사람들이 가까운 가족과 함께 집에 틀어박혀 이웃과 유대 관계를 맺지 않는다( <b>stay in their homes with close family and do not build bonds with their neighbors</b> ). |

4  
단계

마지막 부분을 대입시켜서 전체적인 글의 흐름이 자연스러운지 확인한다.

|     |                                                                             |
|-----|-----------------------------------------------------------------------------|
| (C) | <b>Thus</b> they become ~의 <b>Thus</b> 가 고립을 택하는 것을 의미하는데, 이는 문제의 해결책이 아니다. |
|     | 다른 사람들과 유대를 맺는 것(to be more connected to others)이 공포와 고립을 줄여 주는 유일한 해결책이다.  |

최종 단계: 다른 순서도 가능한지 검토한 후, 정답을 최종 결정한다.

☞ 사람들의 여러 걱정 → (B) 안녕에 대한 과대평가에 기인 → (A) 이웃과의 유대 단절 → (C) 유대 강화가 유일한 해결책: 고립과 공포를 감소시킴

## 정답과 해설 91쪽

Why do we continue to think of negotiation as a win-lose proposition? For one thing, society encourages us to engage in hard bargaining.

- (A) Such an attitude is difficult to unlearn because hard bargaining may have worked in the past, so changing to something that is seen as weaker or emotional is not very appealing. Negotiators often feel that any change would compromise their principles.
- (B) But being flexible does not require compromising principles for the sake of an agreement. Being flexible means protecting and fulfilling your own interests, while finding creative ways to minimally satisfy the interests of others as well.
- (C) Certainly in our society we learn to win at games, beat opponents, and get the best grades, car, or deal, regardless of anyone else's needs.

- ① (A)–(C)–(B)
- ② (B)–(A)–(C)
- ③ (B)–(C)–(A)
- ④ (C)–(A)–(B)
- ⑤ (C)–(B)–(A)

Even between equally talkative cultures, there are differences in conversational style. In American society, we tend to believe that, even in casual conversation, only one person should speak at a time.

- (A) In the late 1980s, the U.S. president’s wife, Nancy Reagan, complained to the press about Raisa Gorbachev, wife of the Soviet president: “From the moment we met, she talked and talked — so much that I could barely get a word in.”
- (B) Yet in many other countries, it is normal for a listener to chime in when someone is talking in order to show enthusiastic participation or involvement with others. Such logic seems to elude many in the United States.
- (C) Probably unaware of the “one speaker at a time” ethic, Mrs. Gorbachev might have been wondering why her U.S. counterpart never said anything — and made her do all the conversational work.
- \*chime in (대화)에 맞장구를 치다. 끼여 들다

- ① (A)–(C)–(B)
- ② (B)–(A)–(C)
- ③ (B)–(C)–(A)
- ④ (C)–(A)–(B)
- ⑤ (C)–(B)–(A)

주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

Rice merchants in Osaka, Japan, had already set up the world's first futures market. Rice was so important in Japan at the time that it was almost a form of currency in itself.

- (A) He paid the farmers ten percent in advance and owed them the rest. After the harvest came in, he stored the rice for several months, selling it for a tidy profit once the north's poor harvest had driven prices up.
- (B) The friend was passing through Nagoya on a journey. He reported that the rice harvest in the north was going to be bad. Chozaemon promptly bought the future Nagoya-area rice harvest.
- (C) The idea of forward trading — buying now goods that are to be delivered later — is said to have originated around 1620, when a Nagoya rice merchant named Chozaemon met a friend from Sendai, in the north of Japan.
- \* futures market 선물 시장(先物市場)

\* futures market 선물 시장(先物市場)

Many states ban people from riding motorcycles without helmets. To some people, however, these bans are questionable. They ask: If people want to take risks, shouldn't they be allowed to do so?

- (A) This approach imposes some costs on those who want to feel the wind in their hair. But requirements of this kind are less intrusive than a ban — and might do a lot of good as well.
- (B) To date, an intense debate has separated those who support such bans from those who insist that the government should let people do what they want. The columnist John Tierney has suggested a novel way that states might promote safety while maintaining freedom.
- (C) The basic idea is that riders who do not want to use the helmet have to get special licenses. To qualify for the license, a rider would have to take an extra driving course and submit proof of health insurance.

## 5 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

For centuries the West has conceived of time as linear. Time is a line stretching between the past and the future, divided into centuries, years, months, weeks, days, hours, minutes, and seconds.

- (A) The future is similarly envisioned as a movement along a line: nations follow five-year plans and try to progress; individuals have careers. Everyone should make a determined movement down the line and overcome obstacles and interruptions in order to “get ahead.”
- (B) This way of thinking is embedded in our culture, and we think this way without thinking about the way we are thinking. We take this way of thinking for granted.
- (C) Every event we unhesitatingly classify along that line: The Age of Dinosaurs is many intervals back, World War II is near our present position; pregnancy may stretch nine months along the line, the act of birth is only a point.

- |               |               |

| ① (A)–(C)–(B) | ② (B)–(A)–(C) |
| ③ (B)–(C)–(A) | ④ (C)–(A)–(B) |
| ⑤ (C)–(B)–(A) |               |

## 6 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?

For Kant, respect for autonomy entails duties to oneself as well as others, most notably the duty to treat humanity as an end in itself.

- (A) But man is not a thing — not something to be used as a means: he must always in his actions be regarded as an end in himself. Kant concludes that a person has no more right to kill himself than to kill someone else.
- (B) If a person does away with himself in order to escape from a painful situation, he is making use of a person merely as a means to maintain a tolerable state of affairs till the end of his life.
- (C) This duty constrains the way a person can treat himself. According to Kant, murder is wrong because it uses the victim as a means rather than respects him as an end. But the same can be true of suicide.

- |               |               |
|---------------|---------------|

World Electricity Generation by Source of Energy in 1971 and 2007

The graphs above show the percentage of world electricity generation by sources of energy for 1971 and 2007. ① According to the graphs, the primary source of electricity generation in both 1971 and 2007 was coal and peat, accounting for over 40% of the total electricity generation. ② Oil showed the biggest decrease in electricity generation, which fell from 20.9% in 1971 to 5.6% in 2007. ③ The source that showed the biggest increase was nuclear, which rose from 2.1% in 1971 to 13.8% in 2007. ④ In 1971, hydro was the second biggest source of electricity generation, but in 2007, gas was the second biggest, accounting for more than 20% of the total electricity generation. ⑤ Besides coal and peat, hydro was the only source that accounted for more than 20% of the total electricity generation in both 1971 and 2007.

## Words &amp; Phrases

- generation 생성, 발생
- hydro 수력 전기

- peat 토탄

- account for ~을 차지하다

## Problem-Solving Strategies

### 1 단계

도표의 제목, 도표의 내용 및 종류를 파악한다.

- ① 1971년과 2007년의 에너지원에 따른 세계 전력 생산  
(World Electricity Generation by Source of Energy in 1971 and 2007)
- ② 왼쪽 표는 1971년의 에너지원, 오른쪽 표는 2007년의 에너지원
- ③ 에너지원의 종류: 석탄과 토탄(coal and peat), 석유(oil), (천연)가스(gas), 원자력(nuclear), 수력(hydro), 기타(other)

### 2 단계

글의 도입 부분을 통해서 전체 글의 주제를 파악한다.

- ① 글의 도입 부분  
그래프는 1971년과 2007년의 에너지원에 따른 세계의 전력 생산 비율을 보여 준다.
- ② 주제  
에너지 생산원의 비율에 대해 과거(1971년)와 최근(2007년)의 시간상 변화를 알려 준다.

### 3 단계

도표의 내용과 본문을 비교한다.

- ① 그래프에 따르면 1971년과 2007년 모두 전력 생산의 주된 에너지원은 석탄과 토탄이었는데, 전체 전력 생산의 40퍼센트 이상을 차지했다. → 일치함

- ② 석유는 전력 생산에서 가장 큰 감소를 보여 주었는데, 1971년 20.9퍼센트에서 2007년 5.6퍼센트로 떨어졌다. → 일치함

- ③ 가장 큰 증가를 보여 준 에너지원은 원자력이었는데, 1971년 2.1퍼센트에서 2007년 13.8퍼센트로 올라갔다. → 일치함

1971

- ④ 1971년에 수력은 두 번째로 큰 전력 생산 에너지원이었지만, 2007년에는 (천연)가스가 두 번째로 큰 에너지원이었으며, 전체 전력 생산의 20퍼센트 이상을 차지했다. → 일치함

2007

- ⑤ 석탄과 토탄을 제외하고, 수력은 1971년과 2007년에 전체 전력 생산의 20퍼센트 이상을 차지한 유일한 에너지원이었다. → 불일치 (15.6%)

Trends in Poverty Rates by Age Group: 1959-1992

The graph above shows the trends in poverty rates for various age groups over the period from 1959 to 1992. ① In 1959, the poverty rates for older people, which were about 33 and 38 percent, were higher than the poverty rate for children (Ages 0-15) or the population as a whole. ② But the poverty rates for older people declined during the 1970s, reaching their lowest levels in 1989. ③ By 1992, poverty among older men had fallen below the average for all ages, and poverty among older women differed significantly from the average for all ages. ④ In contrast, the poverty rate for children rose from 1969 to 1992. ⑤ Overall, the elderly experienced larger decline than children and the total population in poverty rates.

## 2

Snow Sports Participation Trends

The graph shows the trends of snow sports participation in the past four winter seasons of 2006/2007 to 2009/2010. ① In each of the seasons, alpine skiing had more participants than any of the other sports: snowboarding, cross country skiing, and freestyle skiing. ② But the number of participants in alpine skiing in the 2007/2008 season decreased a little compared to the previous season. ③ In both snowboarding and cross country skiing, the number of participants showed a steady increase over the four winter seasons. ④ In the 2009/2010 season, cross country skiing was more popular than freestyle skiing, and the difference from the previous season's participants was smaller in the latter than in the former. ⑤ In the same season, the combined number of participants in alpine skiing and snowboarding was nearly 19,000,000.

## 3 다음 도표의 내용과 일치하지 않는 것은?

Long-term Food and Energy Price Trends

The above graph, from the Food and Agriculture Organization of the United Nations (FAO), shows long-term food and energy price trends, real or nominal. ① The FAO index of nominal food prices was relatively constant from the mid-1970s to the mid-1990s but doubled between 2002 and 2008. ② The index of energy prices showed a gentle decline in the early 1990s but began rising in 1999, having tripled since 2002. ③ The index of real food prices began rising in 2002, after three decades of predominantly declining trends, and spiked sharply upwards in 2006 and 2007. ④ By 2008, the real food price index was approximately 60 percent above the level of 2002. ⑤ The only other period of significantly rising real food prices since this data series began occurred in the early 1970s, during which nominal food prices also significantly rose.

\* nominal 명목의
