Schoolteacher Carol Tateishi writes that in her Asian upbringing, she was taught that ① silence is a sign of self-reliance and strength. She interviewed five Asian American secondary school students from various ② ethnic backgrounds. Even though their families spanned 100 years of immigration, some recurrent themes emerged, such as “you’re not supposed to say too much” and “③ talk could cause disrespect and harsh feelings.” The girls who entered U.S. schools as English language learners ④ feared speaking up because they were self-conscious about their language skills. Another girl mentioned that girls “were not supposed to speak unless spoken to.” ⑤ Excess in speech was valued by these students and their families, whereas speaking in class and classroom dialogue is taken as intellectual engagement and meaning-making in U.S. classrooms.

2 Nietzsche에 관한 다음 글의 내용과 일치하지 않는 것은?

Nietzsche is one of the supreme literary artists among philosophers. Many Germans regard him as the greatest of all writers of German prose. One reason why Nietzsche has been able to speak to so many creative artists is that he was himself something of an artist among philosophers. He wrote good poetry and composed music, and the most significant friendship in his life was with the composer Wagner. But more important than any of this, his literary style was one of extraordinary brilliance; and this was almost bound to be attractive to other writers. Most of his books are not written in the same sort of extended prose as other philosophy, with arguments and counter-arguments, laid out at length, but are presented in broken-up forms: aphorisms, or biblical verses, or separately numbered paragraphs.

* aphorism 경구, 잠언

- ① 많은 독일인이 독일 산문의 대가로 여긴다.
- ② 예술성이 뛰어난 철학자였다.
- ③ Wagner와의 친분 관계가 각별하였다.
- ④ 다른 작가들이 매력적으로 느끼는 문체의 소유자였다.

_____ have influences on the development of form in functional pottery. For example, the way that the pottery is used, and in what sort of environment, has a strong effect on the way that the bases of ceramic objects are made. In cultures that use tables, the base of the object needs to be flat or nearly flat. In other cultures that may have little use for tables, pots may be hung from branches, walls, or hooks: pots used in this way often have pointed bases. In yet other cultures, the objects may be placed directly on earth or sand floors: in this case, we often find pots with rounded bases that can be made to tip or roll easily in use. These forms would often be set on a braided fiber ring, or even a ceramic ring, to facilitate tipping.

* braided 짚, 끈

- ① The kinds of raw materials used
- ② Geographic and climatic conditions
- ③ The methods by which pots are carried
- ④ The ways of preparing and serving food
- ⑤ Mankind's varied customs and living habits

4 Caral에 관한 다음 글의 내용과 일치하지 않는 것은?

Six earth-and-rock mounds rise out of the windswept desert of the Supe Valley near the coast of Peru. They appear to be natural hills in a desert region squeezed between the Pacific Ocean and the mountains of the Andean Cordillera. However, these are human-made pyramids, remains of a city called "Caral." Though Caral was discovered in 1905, most archaeologists were uninterested in it because they believed the remaining structures were fairly recent. New evidence, however, indicates Caral prospered nearly 5,000 years ago. Research developed by Ruth Shady Solis, a Peruvian archaeologist, suggests that Caral, with the huge complex of pyramids, plazas, and residential buildings, was a thriving metropolis as Egypt's great pyramids were being built.

Tom Osborne loved coaching. It was his life. But he was more. He was more than just a coach. If you would ask any of his players, they would tell you that he was a father figure, a good friend. He loved the coaching and the teaching associated with college football. But probably more than that, he loved the opportunity to help his players grow mentally and spiritually and become outstanding citizens. As Coach Osborne has said over his magnificent career, that in the end is all that counts. When the game is over, it is over. But what that young man does with his life at the end of his football career is most important; how he contributes to his community, to his family and to his nation is most important.

As humorist Will Rogers once said that money was all appropriated for the top in hopes that it would trickle down to the needy, we might expect tourism to generate benefits across the economy. After all, tourists are demanding: they need feeding and watering and entertaining. They need someone to grow the food, make the furniture, bottle the beer and so on. But too often, in poor countries, tourists eat imported food and sleep in rooms where nothing has been made locally. Tourists demand their cornflakes and steaks, their cheeses and crisps—as if they were at home; and they want imported beers rather than local brands. All of this contributes to leakage. As a result, many tourism earnings are either retained by the tourist-sending countries or sent back to them in some way. Somehow or other, it ends up with our hosts—not us—picking up much of the bill.

Tourism services cannot be produced and stored today for consumption in the future. For example, an airline flight that has 100 empty seats on a 400-seat airplane cannot compensate for the shortfall by selling 500 seats on the next flight of that airplane. The 100 seats are irrevocably lost, along with the revenue that they would normally generate. Because some of this loss is attributable to airline passengers or hotel guests who do not take up their reservations, most businesses ‘overbook’ their services on the basis of the average number of seats that have not been claimed in the past. This characteristic of tourism also helps to explain why airlines and other tourism businesses offer last-minute sales or stand-by rates at drastically reduced prices. While they will not obtain as much profit from these clients, at least some revenue can be recovered at minimal extra cost.

*irrevocably 돌이킬 수 없게

- ① reasons to support tourism business development
- ② strategies to minimize irrevocable loss in tourism
- ③ roles of international airlines in tourism promotion
- ④ impacts of rapid tourism expansion on the economy
- ⑤ different ways of pricing tourism products and services

Such creative running occurs when the runner has become so relaxed that he is only barely aware of the physical act of running. Then, running, unlike any other activity, becomes a ③ means toward solving problems and curing depression. Many runners report that they are able to solve the problems of their work, and that they are able to see their potential even ④ while depressed, because of running. This usually occurs only when the runner is relaxed and doesn’t carry any great expectations into the run. The apparent magic that running sometimes provides ⑤ occurs almost inevitably as a surprise.

Since most of you are working on a word processor, it seems silly to spend too much time on spelling. Your word-processing program will spell check items for you. _____ (A) _____, spelling is not a completely lost art. There are words that are not in the spell checker's dictionary. Also, your spell checker will not help you if you misspell a word and mistakenly turn it into another word. _____ (B) _____, when you write 'lightening' instead of 'lightning,' the program will not recognize the error. So, get in the habit of rereading your work and looking up words that the spell checker does not pick up. You need to develop the skill of knowing when words look wrong. Never hand something in until you have checked it.

Education is a powerful force that can speed up economic growth, improve income distribution, and reduce poverty. It can also improve the quality of life for citizens by contributing to longer life expectancy, lower infant mortality rates, and a more cohesive national identity. ____ (A) ____, attaining these benefits from investing in human capital through education is not automatic. All too often, higher investment in education is not associated with faster economic growth, especially when the system fails to produce the quality of skilled labor required to meet demand or when demand itself is inadequate. Similarly, poor-quality education effectively erodes its returns, leading to high dropout rates, especially among the poor. ____ (B) ____, rather than enhancing social cohesion, improving health outcomes, and strengthening the future development capacity of a nation, education is sometimes used by vested interest groups to advance particular causes at the expense of the broader public good.

Parents today are pretty shocked about how neglectful parents used to be in the olden days. Now some parents think their job is to protect children from every hurt and danger. But that is not possible, and not desirable. What we need to give them instead is the strength, the confidence, the skills, and the connection with others that allows them to cope with being hurt, and even grow from it. Of course, we provide basic safety and try to keep the dangers away, though some things such as illness and injury are largely beyond our control. Why do we keep playgrounds open even though it's possible for children to break an arm or a leg? Because they have to play, even with the risk. The harsher realities of life — death, homelessness, war, poverty, injustice, violence — are scary to children, but we can't keep them sheltered indefinitely.
