

3 다음 빈칸에 들어갈 말로 가장 적절한 것은?

From the very beginning of school we make books and reading a constant source of _____. When children are little we make them read aloud, before the teacher and other children, so that we can be sure they “know” all the words they are reading. This means that when they don’t know a word, they are going to make a mistake, right in front of everyone. Instantly they are made to realize that they have done something wrong. Perhaps some of the other children will begin to wave their hands and say, “Ooooh! O-o-ooh!” Perhaps they will just giggle or make a face. Perhaps the teacher will say, “Are you sure?” or ask someone else what he thinks. Or perhaps, if the teacher is kindly, she will just smile a sweet, sad smile — often one of the most painful punishments a child can suffer in school.

- ① inspiration and motivation
- ② amusement for young children
- ③ possible failure and public humiliation
- ④ interactive cooperative learning activities
- ⑤ goals that schoolchildren ought to achieve

4 다음 글에서 필자가 주장하는 바로 가장 적절한 것은?

I am not arguing here that the arts in education cannot serve various educational ends. They necessarily do. Seeing narrative at work in the visual arts expands a student’s sense of what storytelling entails, just as a visual or dramatic portrayal of a historic event may make it particularly memorable. When explaining or defending the role of the arts in education, however, we should resist the temptation to package the arts as supplementary to non-arts subjects — as a way to help teach math or chemistry or physics. The value of the arts in education is clear and non-negotiable and must withstand rather than respond to differing tides and winds. We need to include the arts in education not because they serve other kinds of learning, but because they offer students opportunities for learning that other subjects do not. The arts are essential to general education.

- ① 예술 교육의 독립적 가치를 인식해야 한다.
- ② 예술 교육은 타 교과와 통합하여 가르쳐야 한다.
- ③ 체험 학습을 통하여 예술을 이해하도록 해야 한다.
- ④ 시대의 요구에 맞게 예술 교육 방법을 다양화해야 한다.
- ⑤ 예술의 다양한 교육적 용도를 활용하는 방안을 강구해야 한다.

Edwin Armstrong에 관한 다음 글의 내용과 일치하지 않는 것은?

• 2011년 9월 시행 모의평가 38번 •

Edwin Armstrong, who first discovered and developed FM radio in the 1920s and early 1930s, is often considered the most prolific and influential inventor in radio history. He alone understood the impact of De Forest's vacuum tube, and he used it to invent an amplifying system that enabled radio receivers to pick up distant signals. Armstrong's innovations rendered useless the enormous alternators used for generating power in early radio transmitters. In 1922, he sold a 'super' version of his circuit to Radio Corporation of America (RCA) for \$200,000 and sixty thousand shares of RCA stock, making him a millionaire as well as RCA's largest private stockholder. Armstrong also worked on the major problem of radio reception—electrical interference. Between 1930 and 1933, the inventor filed five patents on FM.

* alternator 교류발전기

- ① 라디오 역사상 가장 영향력 있는 발명가로 여겨지곤 한다.
- ② 전파 수신기로 하여금 원거리 신호를 잡게 해주는 증폭 장치를 발명했다.
- ③ 그의 혁신적 장치들로 인하여 초기 전파 송신기에 사용되던 거대한 교류발전기가 필요 없어졌다.
- ④ 1922년에 자신의 고성능 회로를 RCA에 기증했다.
- ⑤ 1930년부터 1933년 사이에, FM에 관한 5개의 특허를 출원했다.

Vocabulary Power

- * **circulation:** [주로 단수로] (신문·잡지의) 판매 부수 (the number of copies of a newspaper or magazine that are sold each time it is produced)
This magazine has a **circulation** of 20,000. 이 잡지는 판매 부수가 2만이다.
- * **coverage:** (신문·텔레비전·라디오의) 보도[방송] (news about something on television or radio or in the newspapers)
Now a special TV network gives live **coverage** of most races.
이젠 특별 TV 네트워크 방송이 대부분의 경기를 생방송해 준다.
- * **subscription (to/for sth):** 구독료; 구독 (an amount of money that you pay regularly in order to receive copies of a magazine or newspaper)
Did you renew your **subscription** to this magazine? 이 잡지의 구독을 갱신했나요?
- * **press:** 신문(과 잡지), 언론 (newspapers, periodicals, and often radio and television news broadcasting)
He intentionally leaked the news to the **press**. 그는 일부러 언론에 뉴스를 흘렸다.
- * **censorship:** 검열 (the censoring of books, plays, films, or reports, especially by government officials, because they are considered immoral or secret in some way)
Some feel **censorship** is a violation of their rights. 몇몇 사람들은 검열이 자신들의 권리에 대한 침해라고 생각한다.
- * **propaganda:** (정치 지도자·정당 등에 대한 종종 허위·과장된) 선전 (information, often inaccurate information, which a political organization publishes or broadcasts in order to influence people)
The news reports were being discounted as **propaganda**. 그 뉴스 보도들은 정치 선전으로 치부되고 있었다.
- * **editorial:** 사설 (an article in a newspaper which gives the opinion of the editor or owner on a topic or item of news)
The Times ran a front-page **editorial** supporting his candidacy.
타임스 지(誌)는 제1면에 그의 입후보를 지지하는 사설을 게재했다.
- * **broadcasting:** 방송업[계] (the making and sending out of television and radio programmes)
Satellite communications systems have reformed the **broadcasting** industries.
위성 통신은 방송 산업을 크게 변화시켰다.

2 Willa B. Brown에 관한 다음 글의 내용과 일치하지 않는 것은?

Willa B. Brown was the first African American woman who got a commercial pilot license. She was born in 1906 in Glasgow, Kentucky. She received her bachelor's degree in 1927 at Indiana State Teacher's College. She taught in Indiana for a while and then moved to Chicago. Influenced by Bessie Coleman, Willa started taking flying lessons in 1934. Soon she became a member of the flying club, the Challenger Air Pilot's Association. She also purchased her own airplane. In 1937, she received her pilot's license and that same year, she received a master's degree from Northwestern University. In 1938, she and her flight instructor, Cornelius R. Coffey started the Coffey School of Aeronautics, where approximately 200 pilots were trained in the next seven years. Some of those pilots later became part of the 99th Pursuit Squadron at Tuskegee Institute.

- ① 켄터키 주 Glasgow에서 태어났다.
- ② 인디애나 주에서 학생을 가르치다가 시카고로 이주했다.
- ③ 1934년에 Bessie Coleman에게 비행 교육을 시켰다.
- ④ 1937년에 Northwestern 대학교에서 석사 학위를 받았다.
- ⑤ 1938년에 Cornelius R. Coffey와 함께 항공 학교를 설립했다.

- ⑤ (C)–(B)–(A)

4 Alice Walker에 관한 다음 글의 내용과 일치하는 것은?

In the summer of 1966, Alice Walker, who would later win a Pulitzer Prize for *The Color Purple*, spent her days battling racism in Mississippi. She had recently won her first writing fellowship and could have chosen to follow her dream of moving to Senegal, Africa, but instead she put herself in the heat of the civil rights movement. Born in 1944, Walker was the eighth child of Georgia farmers who earned about \$300 a year. When she was 8, her brother accidentally shot her in the left eye with a BB gun. By the time her parents got her to the hospital a week later (they had no car), she was blind in that eye. Despite the counts against her, Walker has become an award-winning novelist. As Walker puts it, she writes about people who “make it, who come out of nothing. People who triumph.”

* fellowship 지원금

- ① 1966년 여름에 풀리처상을 수상했다.
- ② 저작 지원금을 받고 아프리카의 세네갈로 이주했다.
- ③ 1944년에 연 300달러를 받고 농장에 취직했다.
- ④ 8살이 되던 해에 사고로 왼쪽 눈을 실명했다.
- ⑤ 작품에서는 인생에서 실패한 사람들을 다루었다.

• 2011년 9월 시행 모의평가 41번 •

The green revolution was a mixed blessing. Over time farmers came to rely heavily on broadly adapted, high-yield crops to the exclusion of varieties adapted to local conditions. Monocropping vast fields with the same genetically uniform seeds helps boost yield and meet immediate hunger needs. Yet high-yield varieties are also genetically weaker crops that require expensive chemical fertilizers and toxic pesticides. The same holds true for high-yield livestock breeds, which often require expensive feed and medicinal care to survive in foreign climates. The drive to increase production is pushing out local varieties, diluting livestock's genetic diversity in the process. As a result, the world's food supply has become largely dependent on a shrinking list of breeds designed for maximum yield. In short, in our focus on increasing the amount of food we produce today, we have accidentally put ourselves at risk for food shortages in the future.

- ① Pros and Cons of Using Chemical Fertilizers
- ② Is Genetic Diversity a Blessing in Disguise?
- ③ Who Will Conquer Famine, Farmers or Scientists?
- ④ Livestock Diseases: A Never-ending Struggle
- ⑤ Farming Uniform Breeds: A Double-edged Sword

Words & Phrases

- green revolution 녹색 혁명 (품종 개량에 의한 식량 증산)
- adapted (~에) 알맞은, 개조된
- variety 품종
- genetically 유전적으로
- pesticide 농약

- mixed blessing 좋기도 하고 나쁘기도 한 것
- high-yield 다수확의, 높은 산출량을 가진
- monocrop 단일 경작하다
- fertilizer 비료
- dilute 묽게 하다, 약하게 하다

Vocabulary Power

- * **endangered**: 위험에 처한; (동식물이) 멸종될 위기에 이른 (seriously at risk of extinction)
Elephants are acutely **endangered** in East Africa. 코끼리는 동아프리카에서 심각하게 멸종 위기에 처해 있다.
- * **habitat**: (동식물의) 서식지, 자생지, 산지(産地) (the natural home or environment of an animal, plant, or other organism)
The chimpanzee's natural **habitat** is being destroyed over years. 침팬지의 자연 서식지가 수년에 걸쳐 파괴되고 있다.
- * **pollutant**: 오염 물질, 오염원 (a substance that makes air, water, soil, etc. dangerously dirty, and is caused by cars, factories, etc.)
New regulations will reduce hazardous air **pollutants**. 새로운 법규가 해로운 대기 오염 물질을 감소시킬 것이다.
- * **preservation**: 보존, 보호 (the act of keeping something in its original state or in good condition)
We are working for the **preservation** of the environment. 우리는 환경 보호를 위해 노력하고 있다.
- * **ecosystem**: 생태계 (all the plants and living creatures in a particular area considered in relation to their physical environment)
Humankind benefits from resources that are supplied by natural **ecosystems**. 인류는 자연의 생태계에 의해 제공되는 자원들로부터 이익을 얻는다.
- * **deforestation**: 삼림 벌채 (the cutting or burning down of all the trees in an area)
The area is also experiencing severe **deforestation** in its southern half. 그 지역 또한 남쪽 절반이 심각한 삼림 훼손을 겪고 있다.
- * **organism**: 유기체, (특히 극도로 작은) 생물(체) (an animal or plant, especially one that is so small that you cannot see it without using a microscope)
Various **organisms** have been destroyed over large areas of the river. 강의 넓은 지역에 걸쳐 다양한 생물들이 파괴되어 왔다.
- * **biodiversity**: (균형 잡힌 환경을 위한) 생물의 다양성 (biological diversity in an environment as indicated by numbers of different species of plants and animals)
Humans are increasingly posing a threat to the Earth's **biodiversity**. 인간은 지구 생물의 다양성에 점점 더 위협을 가하고 있다.

다음 글의 주제로 가장 적절한 것은?

Observations and general circulation models of climate trends indicate that all regions of the world will see increased warming, and this will be particularly marked in polar areas and mountainous regions. Coastal areas will experience sea level rise. By 2050, we will see higher temperatures and sea levels, changes in sea surface conditions and coastal water quality, increased weather variability, and more frequent and extreme weather events, even if global greenhouse gas emissions are stabilized at 2°C above pre-industrial levels. Already the entire energy supply chain is significantly vulnerable to climate variability and extreme events that can affect energy resources and supplies as well as seasonal demand; the projected changes will increase this vulnerability, and thus the need to adapt to changing conditions.

- ① causes of extreme weather conditions
- ② regional differences in climate change
- ③ sustainable development of the environment
- ④ preventive measures against global warming
- ⑤ climate change and its impacts on energy systems

2

다음 빈칸에 들어갈 말로 가장 적절한 것은?

American alligators have no natural predators except humans. Hunters once killed large numbers of these animals to make shoes, belts and pocketbooks. Other people considered alligators to be useless and dangerous, and hunted them for sport or out of hatred. Between 1950 and 1960, hunters wiped out 90% of the alligators in Louisiana, and by the 1960s the alligator population in the Florida Everglades was also near extinction. These hunters often say “So what?” but they overlook _____. Alligators dig deep gator holes that collect fresh water during dry spells. As alligators move from gator holes to nesting places, they help keep areas of open water free of invading vegetation. Without these ecosystem services, fresh water ponds and coastal wetlands found in the alligator’s habitat would be filled in by shrubs and trees, and dozens of species would disappear.

- ① alligators in danger of extinction
- ② the destruction of wildlife habitat
- ③ the roles of alligators in ecosystems
- ④ the adaptation of alligators to environment
- ⑤ the harmful effects of alligators on ecosystems

3 다음 글에서 전체 흐름과 관계 없는 문장은?

Waste has always been intrinsic to industrial production. Because industrial cycles are never complete—because there is no *return*—there are two characteristic results of industrial enterprise: exhaustion and contamination. ① The energy industry, for instance, is not a cycle, but only a short arc between an empty hole and poisoned air. ② And farming, which is inherently cyclic, capable of regenerating and reproducing itself indefinitely, becomes similarly destructive and self-exhausting when transformed into an industry. ③ Agricultural pollution is a growing problem and industrial agriculture is forced by its character to treat the soil itself as a “raw material,” which it proceeds to “use up.” ④ Among the benefits of industrial agriculture have been cheap food and a release of labor from agricultural activities for employment in other sectors. ⑤ It has been estimated, for instance, that at the present rate of cropland erosion Iowa’s soil will be exhausted by 2050.

4 다음 빈칸에 들어갈 말로 가장 적절한 것은?

Environmental scientists study the influence of human actions on natural processes. These scientists attempt to integrate information from many traditionally separate areas of learning such as ecology, economics, politics, and anthropology. However, more vocal and influential than environmental scientists are those members of the general public who are environmentalists. Recent polls show that 70% of the public are concerned that human actions are leading to the degradation of the planet. Environmentalists object to the degradation of our planet on aesthetic, moral, and pragmatic grounds. Their arguments may be drawn on scientific data, but they are just as likely to be based on emotional appeal or on ethical or moral criteria. Both science and environmentalism have their place in modern society, but a distinction should be maintained. It is important that testable fact as determined by scientific investigation is kept different from _____.

* degradation 악화, 퇴보

- ① unconditional or blind belief
- ② heartfelt opinion or speculation
- ③ accidentally disclosed information
- ④ practical ideas that can be easily implemented
- ⑤ supernatural forces beyond our understanding

Sveta Bogoroditsa에 관한 글의 내용과 일치하는 것은?

• 2011년 9월 시행 모의평가 37번 •

The church 'Sveta Bogoroditsa' ('Holy Virgin') in Karlovo has a handsome profile with its blue and white bell tower. The bell tower is relatively new, from 1897, but the church building, as the inscription above the western entrance tells us, dates from 1851. Before they began constructing this new building in 1847, the older church of the Holy Virgin had burned down in 1813. This latter church, about which little is known, is believed by some to have been built already at the end of the fifteenth century, at the time of the founding of the little town of Karli-ova, later Karlovo. In any case, the names of priests serving in the church have been preserved from the eighteenth century on. Although the construction was completed in 1851, the events of the Crimean War and lack of funds delayed the furnishing of the church, and its consecration did not take place until May 20, 1858.

* consecration 헌당(식)

- ① 윤곽선이 아름다우며 흑색 종탑을 가지고 있다.
- ② 교회 건물보다 먼저 세워진 종탑이 있다.
- ③ Karli-ova 마을이 세워질 무렵 화재로 타 버렸다.
- ④ 봉직한 사제들의 이름이 18세기부터 보존되어 있다.
- ⑤ 1851년 건물 완공과 동시에 모든 비품을 갖추었다.

Words & Phrases
