Inventors often have to persist at their tinkering for a long time in the absence of public demand, because early models perform too ① poorly to be useful. That makes it difficult for an inventor ② to foresee whether his or her awful prototype might eventually find a use and thus warrant more time and expense to develop it. Each year, the United States issues about 70,000 patents, only ③ a few of which ultimately reach the stage of commercial production. For each great invention that ultimately found a use, there are countless others that did not. Even inventions that meet the need ④ which they were initially designed may later prove more valuable at meeting unforeseen needs. While James Watt designed his steam engine to pump water from mines, it soon was supplying power to cotton mills, then (with much greater profit) ⑤ propelling locomotives and boats.

It seemed that all of the previous magnificence of the Byzantine Empire (A) has / had disappeared until Emperor Justinian took the throne. Under his rule, the Byzantine Empire improved in several ways. Justinian helped his people by recovering the lands that had once been part of the Roman Empire, many of (B) which / them had fallen into the hands of invaders from the north. Justinian was tired of paying off the invaders in order to keep them at bay. He decided it was time to recover the lands. With the help of General Belisarius, the areas in Northern Africa were quickly (C) taking / taken back in 533. In 536, Justinian sent Belisarius to fight in Italy. Though outnumbered in battle, the general was victorious.

In almost all countries, nuclear energy has been incorrectly packaged as “clean, renewable energy” simply because it produces no carbon emissions. ① This may be true, but it is also a fact that nuclear power plants produce a by-product that is far more dangerous than carbon: *live radioactive waste*. ② Of all the energy sources, nuclear energy has definitely the lowest impact on our environment, including land, water, and air. ③ Although not widely known, nuclear power plants must shut down approximately every eighteen months to replace their fuel rods. ④ The old fuel rods contain short-lived, low-level poisons as well as a highly toxic, radioactive material called Np-237, which has a half-life of more than two million years. ⑤ Today we produce the “equivalent of one-hundred two-level buses” of nuclear waste every year — waste that has to be stored somewhere.

What teenagers are not good at is fully understanding the consequences of what they are doing, in the eyes of society as a whole. And this is where teaching (in the broadest sense of the word) comes in. They need to know when it would be appropriate to text and when it would not be. They need to know when textisms, the languages used in text messages, characterized by the use of abbreviations, single letters and symbols, are effective and when they are not. They need to appreciate the range of social reactions which texting, in its various forms, can elicit. This knowledge is slowly acquired from parents, peers, and teachers. Teenagers have to learn to manage this new behavior, as indeed do we all. For one thing is certain: texting is not going to go away in the foreseeable future.

- ① 기성세대는 십대와의 소통을 위해 문자 메시지를 적극 활용해야 한다.
- ② 십대는 문자 메시지를 분별 있게 사용하는 법을 배워야 한다.
- ③ 휴대 전화 개발 시 십대의 휴대 전화 사용 성향을 고려해야 한다.
- ④ 문자 메시지용 축약 표현을 표준 언어 표현으로 인정해야 한다.
- ⑤ 과도한 휴대 전화 사용으로 인한 건강상의 위험을 경고해야 한다.

I was attending an all-day sales seminar and was anxious to shake hands with our sales manager, who had delivered an inspiring speech. After waiting in line for three hours, it was finally my turn to meet him. He never even looked at me. Instead he looked over my shoulder to see how much longer the line was. He wasn't even aware that he was shaking my hand. And although I realized how tired he must have been, I, too, had been there for three hours and was just as tired! I was hurt and offended because he had treated me as if I didn't even exist. Right on the spot I made a decision that if I ever became someone whom people waited in line to shake hands with, I'd give the person in front of me my _____ — no matter how tired I was!

We all know how the media _____. Once when the head of the Swedish Lutheran Church came to America for a conference, he was warned to watch what he said to reporters. Sure enough, as he got off the plane, a group of news reporters met him and one of them asked, "Do you intend to visit any beer joints in New York?" The bishop smiled innocently and asked, "Are there any beer joints in New York?" The next morning when he opened his paper, he realized what the warnings meant, because the story about his arrival said, "When the bishop stepped off the plane, his first words on American soil were, 'Are there any beer joints in New York?'"

- ① are able to report news quickly and accurately
- ② have a high regard for what people think, feel, and want
- ③ investigate and dig into private life of public personalities
- ④ may distort a news story and present an unfavorable twist
- ⑤ try to shine a light on unethical conduct by religious leaders

11 다음 글의 빈칸에 들어갈 말로 가장 적절한 것은?

Prior to the Industrial Revolution, there were few communities in Europe or America with a population larger than a few thousand. One of the consequences of the Industrial Revolution was the development of large urban areas close to factories. Because employment opportunities were limited in rural areas, many workers moved to cities. With such movement, family and kinship ties were broken, and those who were unable to adapt faced alienation, social breakdown, and a loss of community identity. In an attempt to meet the needs of people living in urban areas, _____ in the 1800s—primarily at the initiation of the clergy and religious groups. Because of the lack of development of public social services, private agencies provided most of the funds and services to the needy until the 1930s.

- ① human rights movements emerged
- ② independent labor organizations were set up
- ③ various kinds of convenient facilities were built
- ④ private social welfare services began to spring up
- ⑤ a systematic city planning project came into place

12 다음 글의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

As we consider media consumption in the context of anonymous social relations, we mean all of those occasions that involve the presence of _____ (A) _____, such as viewing television in public places like bars, going to concerts or dance clubs, or reading a newspaper on a bus or subway. Typically, there are social rules that govern how we interact with those around us and with the media product. For instance, it is considered rude in our culture, or at least aggressive, to read over another person's shoulder or to get up and change TV channels in a public setting. Any music fan knows what is appropriate at a particular kind of concert. The presence of other people is often crucial to defining the setting and hence the activity of media consumption, despite the fact that the relationships are totally _____ (B) _____.

I go into the high-ceilinged stacks and wander among the shelves, searching for a book that looks interesting. Gentle early-summer sunlight is shining through the open window, the chatter of birds in the garden filtering in. A shelf farther back contains general humanities — collections of world literature, individual writers, and classics. When I open them, most of the books have the smell of an earlier time leaking out between the pages — a special odor of the knowledge and emotions that for ages have been calmly resting between the covers. Since the library has just opened for the day, there's no one else there and I have the elegant reading room all to myself. Every once in a while a gentle breeze blows in through the open window, the white curtain rustling softly in air that has a hint of the sea.

14 (A), (B), (C)의 각 네모 안에서 문맥에 맞는 낱말로 가장 적절한 것은?

A 2001 report reviewed eighty-one research projects conducted over fifteen years and failed to find any new (A) benefits / risks to human health posed by genetically modified crops. Genetically modified foods are no more dangerous than “natural” foods because they are not fundamentally different from natural foods. Virtually every animal and vegetable has been “genetically modified” for millennia by selective breeding. Plants do not have any particular desire to be eaten, so they did not go out of their way to be tasty, healthy, or easy for us to grow and harvest. On the contrary, they did go out of their way to (B) prevent / protect us from eating them, by evolving irritants, toxins, and bitter-tasting compounds. So there is nothing especially safe about natural foods. The “natural” method of selective breeding for pest resistance simply (C) increases / reduces the concentration of the plant's own poisons.

One of the problems of our time is that there are few effective memes for self-restraint left. For most people the notion of sin is hopelessly ① old-fashioned, and secular attempts to channel energy into complex goals — such as the concept of good citizenship, of professional pride, of law and order, of disciplined responsibility — have also ② gained much of their grip on human consciousness. Yet the need to help individuals see the necessity for self-discipline is as ③ urgent as ever. Perhaps if we understood that to determine the course of the future we require all our attention, every last spark of psychic energy, we would be more willing to ④ restrain the natural greed of the self, and heed the call of complexity. After all, it's not a ⑤ bad bargain. In exchange for the unnecessary rewards of pleasure, we gain the always exciting joys of spiritual growth.

* meme 모방을 통해서 다음 세대로 전달되는 문화의 요소

Many of us believe that amnesia, or sudden memory loss, results in the inability to recall one's name and identity. This belief may reflect the way amnesia is usually portrayed in movies, television, and literature. _____ (A) _____, when we meet Matt Damon's character in the movie *The Bourne Identity*, we learn that he has no memory for who he is, why he has the skills he does, or where he is from. He spends much of the movie trying to answer these questions. _____ (B) _____, the inability to remember your name and identity is exceedingly rare in reality. Amnesia most often results from a brain injury that leaves the victim unable to form new memories, but with most memories of the past intact. Some movies do accurately portray this more common syndrome; our favorite *Memento*.

Move future negative consequences into the present. If you turn your air conditioner to a chilly 68°F during the first week in August, meanwhile leaving your back door open for the cat, you might not have to pay any consequences for your inefficient decisions until the second week in September, when the August electricity bill arrives. Alternatively, a household thermostat could be fitted with a bright, digital printout that gave household members continual feedback in dollars and cents about how much energy they were using. In this way, keeping doors tightly closed and covering the windows during the day would have a visible and immediate rewarding effect — whereas turning the air conditioner on would have a visible and immediate punishing effect.

* thermostat 온도 조절 장치

- ① the necessity of more social pressure on recycling
- ② one's willingness to act unselfishly in social dilemmas
- ③ the effect of immediate feedback on energy consumption
- ④ the importance of the intensity of rewards and punishments
- ⑤ ways to reverse people's attitudes towards self-gratification

Government authority rests ultimately in legitimacy. If people do not perceive political leaders and the government as legitimate, it is difficult to maintain social order. In the quest to maintain their legitimacy, political officials may use their connections with athletes, teams, and particular sports to boost their acceptance in the minds of citizens. They assume, as Antonio Gramsci predicted they would, that if they support the sports that people value and enjoy, they can increase their legitimacy as leaders. This is why so many political leaders present themselves as friends of sport, even as faithful fans. They attend highly publicized sport events and associate themselves with high-profile athletes or teams that win major competitions. U.S. presidents traditionally have associated themselves with successful athletes and teams and have invited champions to the White House for photo opportunities.

* legitimacy 법적 정통성

- ① the influence of media on sports
- ② the use of sports for political gain
- ③ the seriousness of violence in sports
- ④ future of international sports organizations
- ⑤ sports as a means of solving international conflicts

19 Peter I에 관한 다음 글의 내용과 일치하는 것은?

Following the death of Alexis I, his two sons from separate marriages fought one another for the right of succession. Peter I took over the empire with a coup d'état in 1689. The young czar traveled throughout Western Europe in 1697-1698 and studied shipbuilding in Holland. In Russia he began to construct a naval fleet and modernized the army. During the Great Northern War, the new fleet and army proved their effectiveness as Russia gained access to the Baltic Sea with the conquest of parts of Finland and the Baltics. Within this new territory, Peter I founded the city of St. Petersburg in 1703 as the new Russian capital. Conceived on the drawing board, the city became the symbol of Russian westernization. Peter I married twice, which led to his children fighting bitterly amongst themselves.

- ① 평화적으로 왕권을 인계 받았다.
- ② Holland에 조선술을 전수했다.
- ③ Great Northern War에서 크게 패했다.
- ④ St. Petersburg를 새로운 수도로 세웠다.
- ⑤ 결혼은 했지만 자식을 두지는 않았다.

20 cowries에 관한 설명으로 다음 글의 내용과 일치하지 않는 것은?

As early as the 13th century, Arab traders were carrying cowries from the Maldiv Islands in the Indian Ocean to Egypt, then across the desert to the markets of sub-Saharan West Africa. Europeans were interested to find that in commercial transactions, Africans tended to prefer cowries to gold, and by the 16th century the shells were being imported in the ships of Dutch and English traders to the Guinea coast of West Africa. With the advent of the Atlantic slave trade, cowries were among the items Europeans exchanged with coastal West African groups for slaves. By the early 18th century, cowrie shells were becoming the bubble wrap of their day. Tons of them were exported from South Asia to Europe to cushion pottery and other delicate items in the china trade, and then reexported from Europe to Africa.

* cowrie (조개) 고둥의 총칭, 그 조가비

- ① 13세기에 사하라 사막 이남의 서아프리카에 들어왔다.
- ② 16세기에 영국 무역선에 의해 Guinea 해안으로 수입되었다.
- ③ 대서양 노예 무역에서 노예에게 선물로 주었다.
- ④ 18세기 초에 껍질을 충격 완화제로 사용했다.
- ⑤ 많은 양이 남아시아에서 유럽으로 수출되었다.

Life Expectancy Then and Now in U.S.

The above graph reports U.S. life expectancy at birth, by gender and race, in selected years.

① Life expectancy of the average person increased over the last 40 years in the U.S. — from 70.8 years (the average for 1970) to 78.3 years in 2010. ② Male life expectancy in the U.S. rose from 67.1 years in 1970 to 75.7 years in 2010. ③ The girl born in 1970 in the U.S. could expect to live 7.6 years more than a boy born at the same time. ④ In 2010, women were still expected to live longer than men, and the gap widened. ⑤ Life expectancy for whites exceeded that for blacks by 7.6 years in 1970, but the gap between white and black life expectancy reduced to 5.1 years over the past 40 years.

22 다음 글의 요지로 가장 적절한 것은?

Prestige differs from wealth and power. Wealth and power are objective entities; an individual can have them regardless of what other people think of the individual. But prestige is subjective, depending on how the individual is perceived by others. If the individual is rich and powerful but is seen by others as unworthy of respect, the individual has low prestige. The boss of an organized crime group may make millions and exercise awesome power, but he will never acquire prestige because most people refuse to hold him in esteem — and they cannot be forced to do so. On the other hand, many college professors may not be rich and powerful, but they do enjoy more prestige than the crime boss.

- ① 사람들이 선호하는 직업은 나라마다 다르다.
- ② 부와 권력은 존경을 받기 위한 필요조건이다.
- ③ 직업을 선택할 때 개인의 적성을 고려해야 한다.
- ④ 개인의 명망은 사회적 인식에 의해 정해진다.
- ⑤ 고등 교육을 받은 사람일수록 더 높은 수입을 얻는다.
